Listing prices, not sales

Who is premium? It depends on what you compare

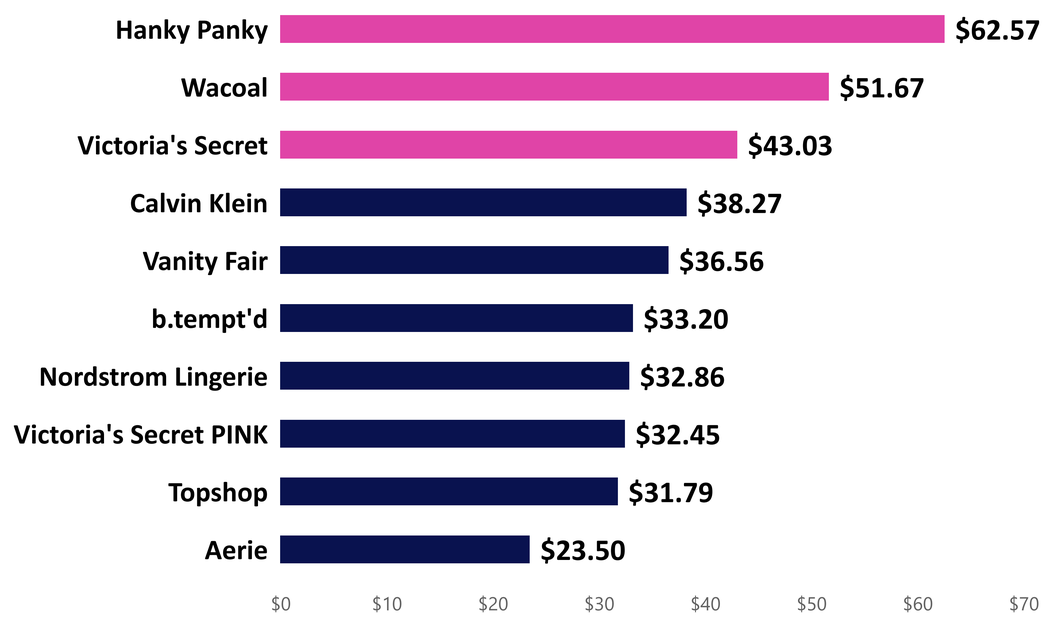

Median listing price by brand. Use the category filter to compare like with like.

Category: Bra

Retailer: All

Median | Average

Chart Average
by brand

brand	Listings	P25 Price	Median Price	P75 Price
Aerie	1946	$17.97	$21.42	$27.96
b.tempt'd	622	$24.85	$37.92	$40.00
Calvin Klein	1251	$32.22	$38.00	$43.56
Hanky Panky	164	$52.00	$57.00	$72.25
Nordstrom Lingerie	22	$21.25	$32.00	$36.00
Topshop	94	$20.00	$30.00	$36.00
Vanity Fair	127	$38.00	$40.00	$40.00
Victoria's Secret	2559	$34.99	$44.50	$55.50
Victoria's Secret PINK	814	$33.50	$34.95	$35.95
Wacoal	2985	$46.00	$54.00	$60.00
Total	**10584**	**$28.00**	**$38.00**	**$51.00**

Unfiltered, Wacoal leads (about $50) and Aerie is last (about $16). Filter to Bra and Hanky Panky edges ahead of Wacoal

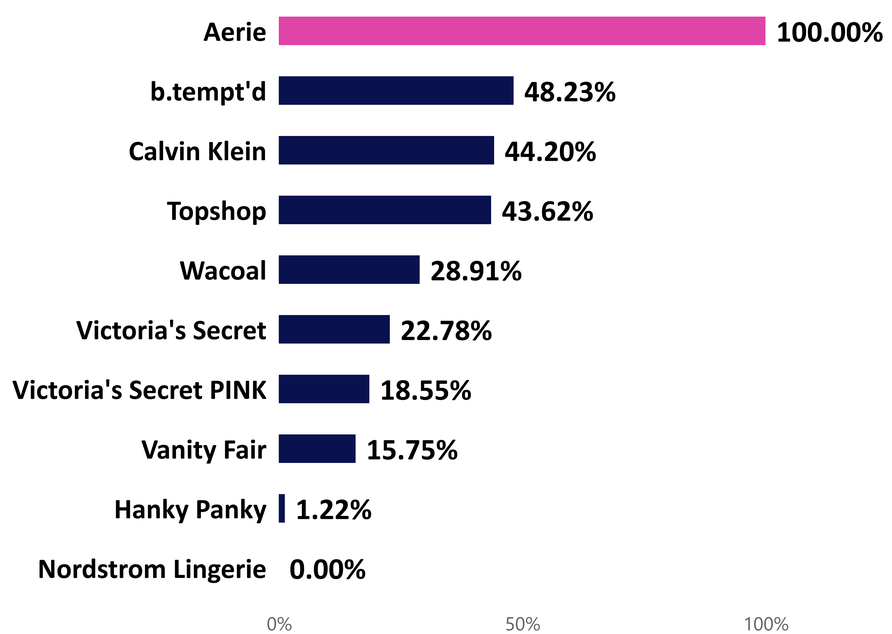

Who relies on discounts? Aerie discounts two in three listings

Share of listings on sale, by brand and by channel. Hover a bar to see the average discount

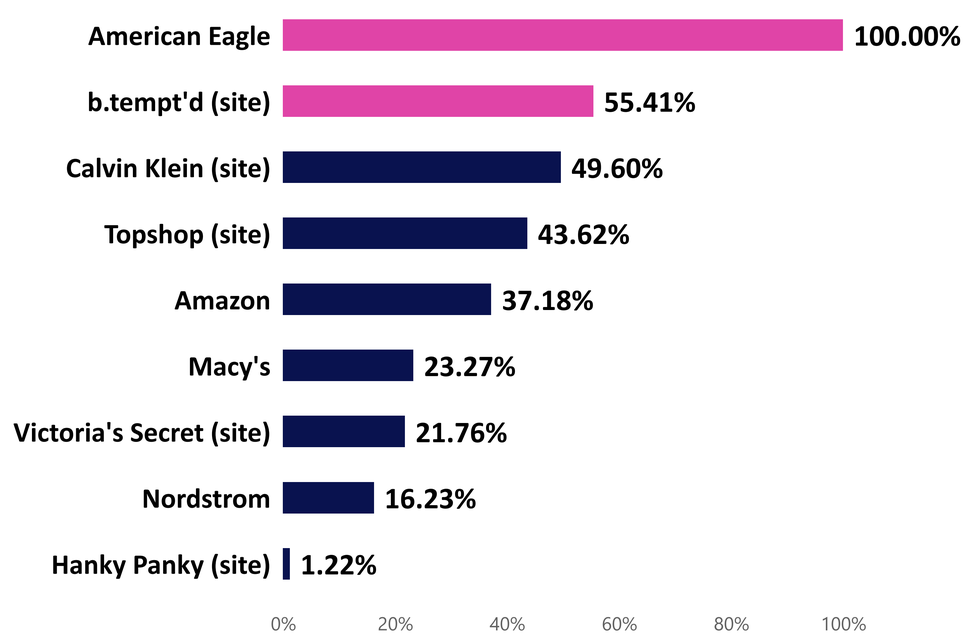

Category

Bra

Share of listings on sale, by brand

Share of listings on sale, by channel

Aerie discounts about two in three listings; Hanky Panky almost none (about 3%). Victoria's Secret discounts fewer listings (about 35%) but cuts deepest among the large brands (about 47% off).

Same brand, different channel: who charges more?

Median listing price by brand and channel. Pick a category first, because the product mix differs by channel.

Wacoal						
Median Price	$54.00				$50.00	$60.00
Channel	0%				-7%	11%

How to read

Pink
Pricier than the brand's own median across channels (15% or more)

Teal
Cheaper than the brand's own median (15% or more below)

No color
Within 15% of the brand's median

Blank
Fewer than 10 listings, or no category chosen

Always pick a category first

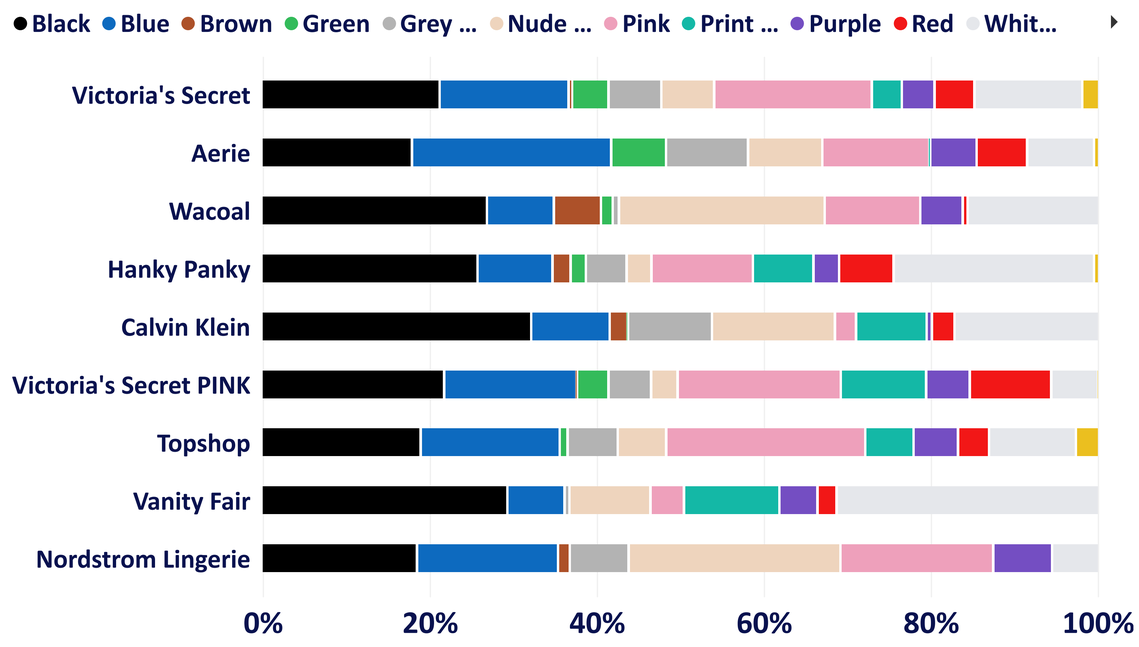

Each channel carries a different product mix, so unfiltered prices are not comparable. Median listing prices, not sales.

Panty: Wacoal is about $26 on Amazon but $15-17.50 at Macy's and Nordstrom. Bra: Calvin Klein stays within $36-42 everywhere. Without a category filter, channels look far apart only because the product mix differs.

Black is a staple, but each brand has its own signature color.

Share of listings by color family, among listings with a recognizable color name.

Color mix by brand (named colors only)

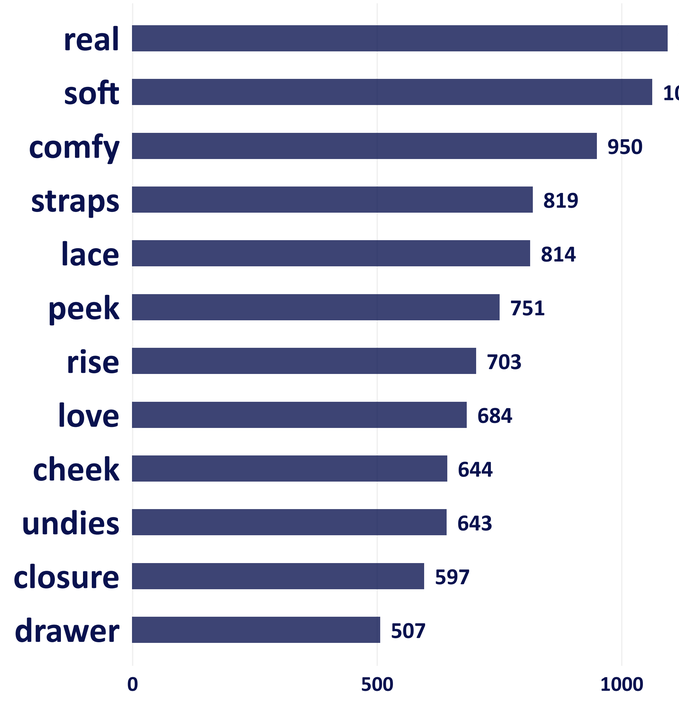

About 18% of listings use brand-style color names (for example "night" or "dusk") that cannot be mapped to a color family and are excluded. b.tempt'd is left out because most of its names fall into that group. Calvin Klein (29% unmapped) and PINK (25%) are included but should be read as approximate.

Brand

Aerie

Top keywords in product descriptions

Aerie leans blue (24%), Wacoal leans nude (25%) and Topshop leans pink (24%); Calvin Klein is the blackest brand (32%).

Price vs rating

Brand profile

Methodology

Listing prices, not sales

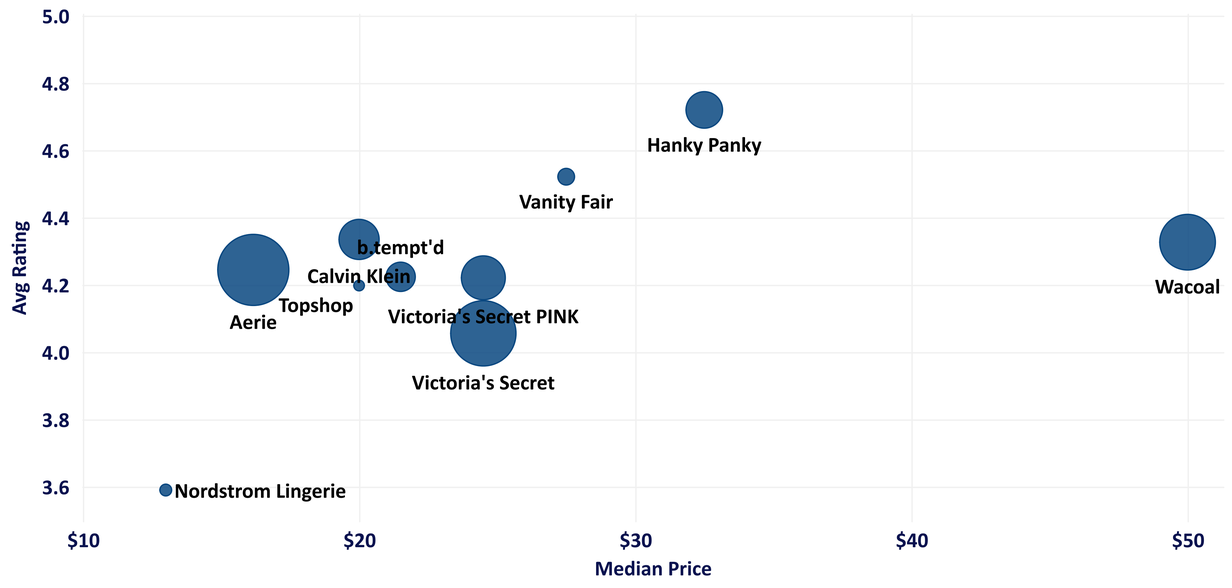

Pricier brands rate slightly higher, but price does not predict rating within a brand.

Ratings exist for 65% of listings, and coverage differs widely by brand.

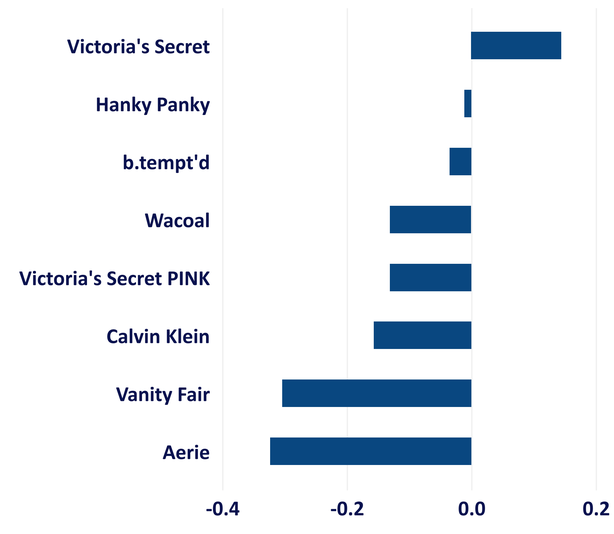

Rating Coverage
65.32%

Price Rating Corr
0.01

Median price vs average rating, by brand

Price vs rating within each brand (correlation)

Across the 10 brands, higher median price goes with a slightly higher average rating (correlation about 0.5). Inside a brand the link is weak or negative, so price alone does not signal quality. Hanky Panky's 4.72 rests on only 35% rated listings.

Category mix

Where it is sold

How this dashboard was built, and what it cannot tell you.

Source: PromptCloud listing data from 9 US retailers, Jun-Jul 2017.

What was done to the data

613,143	raw rows, one per product, color and size
82,996	after removing duplicate rows
34,307	product-color listings (12,298 product pages)
33,732	after removing 575 multi-pack listings

Cleaning steps

- Prices: 4 text formats (single, range, USD text, was/now) turned into numbers
- Brands: 33 spellings merged into 10 brands
- Categories: 525 labels grouped into 6, using the product name first
- Colors: names mapped to 12 color families (about 18% could not be mapped)
- Retailers renamed so brand sites and department stores are easy to tell apart

Problems found and fixed

- Every Macy's item was filed under Shapewear because of its category path
- The b.tempt'd site labelled its own line as Wacoal
- Amazon stored sizes in the color column

Limits and definitions

Read with care

- Listing prices, not sales or popularity
- June to July 2017 only, so no time trend
- Ratings exist for 65% of listings (0% on the Calvin Klein and b.tempt'd sites, 9% on Topshop)
- Swimwear is about 0.6% of listings: this is an innerwear dataset
- Nordstrom Lingerie (74 listings) and Vanity Fair (226) are small samples
- A brand may not carry the same styles on every channel

Definitions

Median price
middle listing price, less distorted by outliers than the average

% on sale
share of listings priced below their list price

Avg discount
average markdown among discounted listings only

Channel premium
channel median divided by the brand's median across channels, minus 1, within one category
